

# Acupuncture

## Acupuncture Therapy In Surrey, BC

Acupuncture is the use of very thin, sterile needles that are inserted into specific points on the body to promote circulation and mobilize your body's natural healing and immune response.

Acupuncture is proven to be one of the safest therapies available, used by millions of people all over the world. In Canada, our strict safety guidelines include using only single-use, sterile, pre-packed needles. As one of the oldest and most widely used forms of medicine, it has stood the test of time. Multiple studies around the world continually attest to its effectiveness. Many western hospitals are now incorporating acupuncture into their facilities. Acupuncture uses your own body, hormones, blood supply and energy to heal YOU. Because it amplifies your body's natural healing mechanisms, it can help in virtually any situation.

## Female Physiotherapist Acupuncture In Surrey, BC

Acupuncture has very good results in whiplash (ICBC motor vehicle accidents), especially in acute cases. It can be used for neck pain, headaches and other musculoskeletal issues.
