

### **Rigid flex PCB board manufacturing in China**

8 layer **Rigid-flex printed circuit board** composed with the material of FR4 Kapton with immersion gold finishing. Hitech can offer one stop solutions from PCB design to PCB fabrication and assembly. Rigid-flex pcb 8 layer mainly uses in mobile, power supply, lighting and telecommunications etc. Hitech is your best supplier for Rigid-flexible pcb in China, please don't hesitate to email: Cynthia<sales11@hitechpcb.com>.

### **Technical Parameters**

- Type: 8L **Rigid-Flex Printed circuit board**
- Laminate: FR4 + Kapton
- Board thickness: 1.6mm (0.062-inch)
- Copper thickness: 35um (1oz) copper for all layers after finish
- Finish: Immersion gold
- Trace width/width: 0.13/0.13mm
