

Flex rigid printed circuit board 10 layers – Hitech Circuits, one stop service provider

The 10 layers multilayers flexible rigid printed circuit board is constructed with premier FR4 + PI material and dazzling immersion gold finishing. Email Cynthia<sales11@hitechpcb.com> if you are looking for Flex-Rigid PCB supplier for electronics products.

Technical Parameters

- Layers: 10 layers Rigid-flex PCB
- Material: FR4 + PI
- Thickness: 1.6mm+/-10%
- Surface treatment: ENIG
- Panel size: 110*135mm
- Specialty: L5-6 (flexible board), L1-4,L7-10 (rigid board)
- Solder mask: Green
- Legend: White
- Vacuum packing ways are available
- Comes with RoHS Directive-compliant
